IDITED BY LAW. REP	ODDITION OF THIS FORE IS PROVIDING.	
URCE		
The Jen	following is a list of research requests a, for the year 1950, and amounts to be sp	of the firm Schott & Genossen, ent:
1. Exp	ancion of the field of application of the J	ena light filters especially
ın.	o the ultra-red and ultra-violet ray range	DN 124,000
2. Res	earch on fine fractionating columns) DE 16,400
3. Jor	k to be carried out in the Microbiological or the direction of Knoell:	Institute
a.	Experiments to obtain the anti-biotics,	ahlama.
	mycetin and aureomycetin	DM 50,000
ъ.	Research on the norphology of bacteria as	nd viruses Dif 50,000
C.	Development of new chemo-therapeutica age culosis in the field of thicsenicarherons	ainst tuber-
c. d.	culosis in the field of thiosemicarbazone	ainst tuber- DI: 80,000
	Tests on experimental therapy of cancer	Di: 80,000
d.	Tests on experimental therapy of cancer Improvement of the streptomycin production crease of the capacity of the base culture.	Dir 80,000 Dir 80,000
d.	Tests on experimental therapy of cancer Improvement of the streptomycin production	Dir 80,000 Dir 80,000
d.	Tests on experimental therapy of cancer Improvement of the streptomycin productic crease of the capacity of the base cultur leistung) and improvement of the culture- conditions Improvement of the penicillin production	Diff 80,000 Diff 80,000 Diff 80,000 Diff 80,000 Diff 80,000
d.	Tests on experimental therapy of cancer Improvement of the streptomycin production crease of the capacity of the base cultural leistung) and improvement of the culturations	Diff 80,000 Diff 80,000 Diff 80,000 Diff 80,000 Diff 80,000
d.	Tests on experimental therapy of cancer Improvement of the streptomycin production crease of the capacity of the base cultural leistung) and improvement of the culturations Improvement of the penicillin production of the base cultural capacity and improvement of the penicillin production of the base cultural capacity and improvement of the capacity and improvement	Dif 80,000 Dif 80,000 Dif 80,000 Dif 80,000 Dif 80,000 Dif 80,000 Dif 100,000
d. c. f.	Tests on experimental therapy of cancer Improvement of the streptomycin production crease of the capacity of the base cultural leistung) and improvement of the culturations Improvement of the penicillin production of the base culture capacity and improvement culture-raising conditions Tota	Dif 80,000 Dif 80,000 Dif 80,000 Dif 80,000 Dif 80,000 Dif 80,000 Dif 100,000 Dif 100,000
d. c. f. 4. At p	Tests on experimental therapy of cancer Improvement of the streptomycin production crease of the capacity of the base cultural leistung) and improvement of the culture-conditions Improvement of the penicillin production of the base culture capacity and improvement culture-raising conditions Tota resent, Schott & Genossen produces about 50 conth. Other smaller plants in the Russian units monthly. This output covers the	Diff 80,000 Diff 80,000 Diff 80,000 Diff 80,000 Diff 80,000 Diff 100,000 Diff 580,400 Diff 580,400 Diff 580,400
d. 6. f. 4. At p per bill	Tests on experimental therapy of cancer Improvement of the streptomycin productic crease of the capacity of the base cultural leistung) and improvement of the culture-conditions Improvement of the penicillin production of the base culture capacity and improvement culture-raising conditions Tota resent, Schott & Genossen produces about 5 conth. Other smaller plants in the Russian units monthly. This output covers the consistency of the contraction of the lass culture resent, Schott & Genossen produces about 5 conth.
